

David (Jiachen) Weng

Product Engineer & Creative Technologist

thedavidweng@gmail.com Vancouver, British Columbia Website Portfolio LinkedIn GitHub

Profile

Product engineer and creative technologist building AI-native music and media tools. I maintain open-source projects across stacks (Tauri + Rust, Go, Rust + egui) with a local-first, agent-friendly design philosophy. My work spans product strategy, full-stack development, AI-integrated workflows, and visual design. Co-Founder of OwO Network, LLC.

Experience

Co-Founder

Mar 2025 - Present

OwO Network, LLC • Wyoming, USA

Technology company providing network acceleration services, AI-powered solutions, and comprehensive IT services for modern businesses.

- Co-founded and operate a technology company delivering network acceleration and AI-powered solutions to a global user base
- Oversee business operations, product direction, and open-source community engagement across the organization's projects

ContentOps & Graphic Designer

Oct 2025 - Present

BC + AI Ecosystem • Vancouver, BC

Lead visual content operations for a growing AI community in British Columbia.

- Designed 50+ branded assets for social media, events, and presentations reaching 3,000+ cumulative viewers
- Managed multi-platform content publishing workflow across LinkedIn, Instagram, and YouTube, maintaining brand consistency across 3 channels

Writer & Editor

Nov 2022 - Present

Citang • Shanghai, China

Create, contextualize, and curate internet culture content with cultural commentary for a bilingual audience.

- Created and contextualized internet culture content, driving 150,090 views on a single post and contributing to 5,000+ follower growth over 6 months
- Curated and annotated meme content with cross-cultural commentary, serving bilingual (CN/EN) audience needs

Projects

OpenMusic Series

Open-source, local-first music tools. OpenKara turns your owned library into a karaoke stage with on-device AI stem separation; OpenLoop is a local AI music generator, an open-source alternative to Suno.

- Built with Tauri 2 + Rust + React, cross-platform desktop apps
- OpenKara: on-device AI stem separation, synced lyrics with multi-language romanization, remote library support, AirPlay casting

- OpenLoop: local AI music generation from text prompts and lyrics; agent-first CLI with NDJSON streaming for automation pipelines

Agent-Friendly CLI Tools

A suite of Go command-line tools for AI agent orchestration across LMS, research repositories, personal finance, and photo management.

- Stable JSON output, predictable exit codes, and distinct stdout/stderr for reliable machine consumption
- Safety gates on all mutation commands with read-only and dry-run modes
- Single static cross-platform binaries

Education

Master's in Management2025

University of Illinois Urbana-Champaign

Bachelor in Media Studies (Minor: Asian Area Studies)2021 - 2025

University of British Columbia

Publications

"Transcending Barriers: Viewing Practices of 'Games of Thrones' in China, India, and Russia"

May 2024

Beacon: UBC Journal of Media Studies

Skills

Engineering

Rust • Go • TypeScript • React • Tauri • egui • SQLite • Cobra • Next.js • TanStack

AI & Local Inference
